Understanding Errors and Warnings

`e_sub_cert_aia_does_not_contain_ocsp_url` :

The certificate is missing a link that allows browsers to check if it has been revoked.

Note: This is standard behavior for "Let's Encrypt" certificates and is usually safe.

`e_dnsname_not_valid_tld` :

The domain name ends in a suffix that doesn't exist (e.g., .local instead of .com or .pk). This certificate will not work publicly.

`w_tls_server_cert_valid_time_longer_than_397_days` :

This certificate was purchased for 2+ years. Modern browsers (Apple, Google) now require certificates to be 1 year or less. It may be rejected soon.

`w_ext_subject_key_identifier_missing_sub_cert` :

The certificate is missing a specific ID tag (Subject Key Identifier) that helps computers sort and organize certificates efficiently.

The "Analysis": Who is responsible?

This table shows which Certificate Authorities (Issuers) are generating the most errors and warnings .

Issuer Name	Total Bad Certs	Example Domain
Let's Encrypt	2726	1jjgame.com.pk
GoDaddy.com, Inc.	36	alrahman.janggroup.com.pk
Starfield Technologies, Inc.	5	ecp.gov.pk
SSL Corporation	4	colorprediction.pk
Google Trust Services	1	alifpakistan.pk
Certainly	1	eyeglasses.pk
CLOUDFLARE, INC.	1	newwatches.pk

Detailed Domain Report

Domain	Errors	Warnings	Technical Details
1jjgame.com.pk	1	0	Errors: e_sub_cert_aia_does_not_contain_ocsp_url
